

To Everdry I just wanted to let you know that I am very pleased with the work you did in my basement November 2008. The workers were very clean. They worked hard they were punctual. They did the outside and inside and they even put wells in our window. When there was a problem that they found with a dryer vent that had broken they told me right away. We also got a easy breath it works well. I have sever~~e~~ asthma. But with this ever dry treatment there is no more mold or dampness in the basement. My lung function is better now. If it wasn't for everdry I probably would have had to move. They also put two brand new sump pumps in. one in the basement and one in the crawl space. I could go on but I just wanted to let you know I would recommend everdry to anyone. I love everdry. Thank you everdry.
